

Morning Brief

Date/Time Stamp: Tuesday, June 07, 2016 - 0800 hrs

Posting frequency is currently weekly, Friday mornings, or as activity dictates. Daily reporting begins with increased fire activity.

Note: Until standard content/format begins, the weekly format serves primarily as a general synopsis of trends in fire activity (wildfire and prescribed) and fire potential. Links to *Fire Potential* and *Fuels Status Products* are listed below as these highlight subjects of interest leading into fire season.

Northwest Activity Summary

Record or near record heat across the northwest with thunderstorms and abundant lightning in the Oregon cascades, southern and eastern Oregon with only light widely scattered precipitation. Light initial attack activity with 12 fires reported. Two large fires are uncontained.

Northwest Current Incident Details

Incidents not Previously Reported: 1

Draw OR-FWF-000136. IMT3. 20 mi NE of Chiloquin, OR. Start: 6/5. **Full Suppression.** Cause: unknown. 500 acres (+498). 0% containment. Timber/brush. Active fire behavior with group torching and spotting.

Incidents Previously Reported: 1

Owyhee Canyon OR-VAD-000020. IMT3, 4 mi S of Rome, OR. Start 6/5. **Full Suppression.** Cause: lightning. 20,495 acres (+8,495) acres. 50% containment. Brush/grass. Active fire behavior. Sage-grouse habitat and wild and scenic river threatened.

Northwest Fires Utilizing Monitor, Confine, Point Zone Protection Suppression Strategies (YTD) (link)

None currently reported.

Lists fires (of any size) that singly utilize Monitor, Confine or Point Zone Protection suppression strategies, or use Multiple Suppression Strategies (which may also include a Full Suppression component).

Northwest Fire Potential Summary

High pressure with temperatures well above normal through and a chance of thunderstorms in southern and eastern Oregon and creeping into Washington. The heat will relent in the middle of the week with cooler but breezy conditions with chances of showers and thunderstorms.
